EXPERIENCE

2026 - NOW	WeightWatchers — Senior Product Security Engineer Rebuilding product security from a compliance function into an engineering one as WeightWatchers moves into clinical care. Securing the AWS and Kubernetes platform underneath it, and building AI agents for detection, triage, and incident response.
2025-2026	Remedy Meds — Senior Product Security Engineer II New York City · GLP-1 care · acquired Thirty Madison Stayed on after the acquisition as the founding security team. Built product security, corporate security, and privacy from nothing.
2023-2026	Thirty Madison — Senior Product Security Engineer; II from 2025 New York City · telehealth for over a million people · \$650M exit Built security for three years, through the \$650M exit. Scaled security and privacy across Nurx, Keeps, and Cove.
2021-2023	Podium — Application Security Engineer; Tech Lead, Product Security (2022–2023) New York City · 100k+ local businesses · \$201M Series D Secured payments from proof of concept to billions in payment volume. Built the product security team for about 200 engineers. Top contributor to Podium’s open Elixir secure-coding curriculum; wrote Semgrep rules for Ash Framework authorization.
2020-2021	TD — Associate, Enterprise Security New York City · global Corporate and Investment Banking On the security engineering and application security teams.
2019	TD — Summer Analyst, Enterprise Security Greater Philadelphia · US Consumer Banking Managed internal and third-party cyber risk on the business information security officer (BISO) team.
2018	New Jersey State Police — Intern, Network Engineering Regional Operations & Intelligence Center, the state’s fusion center

SELECTED WORK

LECTR.BID	lectr — auction intelligence Built an auction-intelligence platform over 1.1M lots from 18 houses: a value engine with a public backtest, and a nightly pipeline behind three publish gates. Cut the nightly from ~130 to 52 min without changing an output. TypeScript, Next.js, Cloudflare R2/Pages, GitHub Actions, Supabase.
SECMCPHUB	SecMCPHub — a monthly security business review Built Claude Code skills that pull vulnerability-management, GRC, and incident data over MCP and render one self-contained HTML report: trend deltas, MTTR, SLA compliance, a weighted composite risk grade, and CWE-mapped attack paths across sources.
SOIREE.TODAY	Soirée — events aggregator Built an events aggregator for NYC, Hoboken/Jersey City, and Philadelphia: scraped at the source, dates normalized, placeholders labeled. Node.js, Cloudflare.

EDUCATION

2021-2023	New York University — M.S. Cyber Security program Cyber Fellowship recipient. Research: stablecoin payments in e-commerce.
2016-2020	Rowan University — B.S. Computer Science, cum laude Concentration in cyber defense. Built Brumby Code Checker, a redundancy scanner for C++, Java, and Ada, with ASRC Federal Mission Solutions for Lockheed Martin systems.

WRITING

MAY 2026	Building an Application Security Program That Actually Works Substack. Four legs, a build order, and the seven failures that sink programs.
